

ALLETT

BJB42

A tractor - or truckster-mounted, PTO - driven machine, for aeration and scarification of fine and amenity turf. An all new scarification system capable of scarification to a depth of 50mm (at 40mm spacing), relieving surface tension, decompacting, scarifying, root pruning and cutting lateral runners all in one pass, and finished for maximum resistance to corrosion and wear.

- Powerlok blades for max power transmission.
- 310-litre capacity collection box, with easy empty from the drivers position.
- 41 tines at 20mm spacing for high performance.
- Unique 230mm offset capability to avoid tramlining.
- Hardened Fan-type blades, reversible when worn.
- Optional tungsten tip blades.
- 37mm timing belt.
- Hand wheel depth adjustment.
- Full-width rollers, front and rear, with scrapers.
- Jackstands.

Specifications
