

Allett Stand-On Tractor

The Allett Stand-on Tractor is a highly manoeuvrable versatile spreading unit powered by a Honda GX160 engine. Ballast front wheels effectively lower the centre of gravity and give improved hill holding capabilities. This is a must have machine ideally suited to stadiums, schools/colleges, estates and golf courses etc. The extra capacity of the Stand-on Tractor makes it an excellent machine for larger properties and sports fields. The machine will halve spreading time for those that currently use a push spreader.

- The turning force is low due to the unique design of the sulky-to-frame attachment.
- The ergonomic positioning of the handlebars reduces stress on the operator.
- The powertrain utilises commercial-duty components including a Honda engine and Peerless transmission.

2 Speed Gearbox Low-
3.5mph (5.6km/hr)

High- 5mph (8km/hr)

Honda GX160 Engine

Articulated steering for
minimal turf damage

220lb (100 kg
capacity hopper
